FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellery or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law — refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter — child of the son or daughter of the head.
5. Other relative — a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others — any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single — If never been married.
- b. Married — Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed — A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated — If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced — If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown — If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoría, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. **Other housing unit (natural shelter, boat, etc.)**

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

EXPLANATORY TEXT

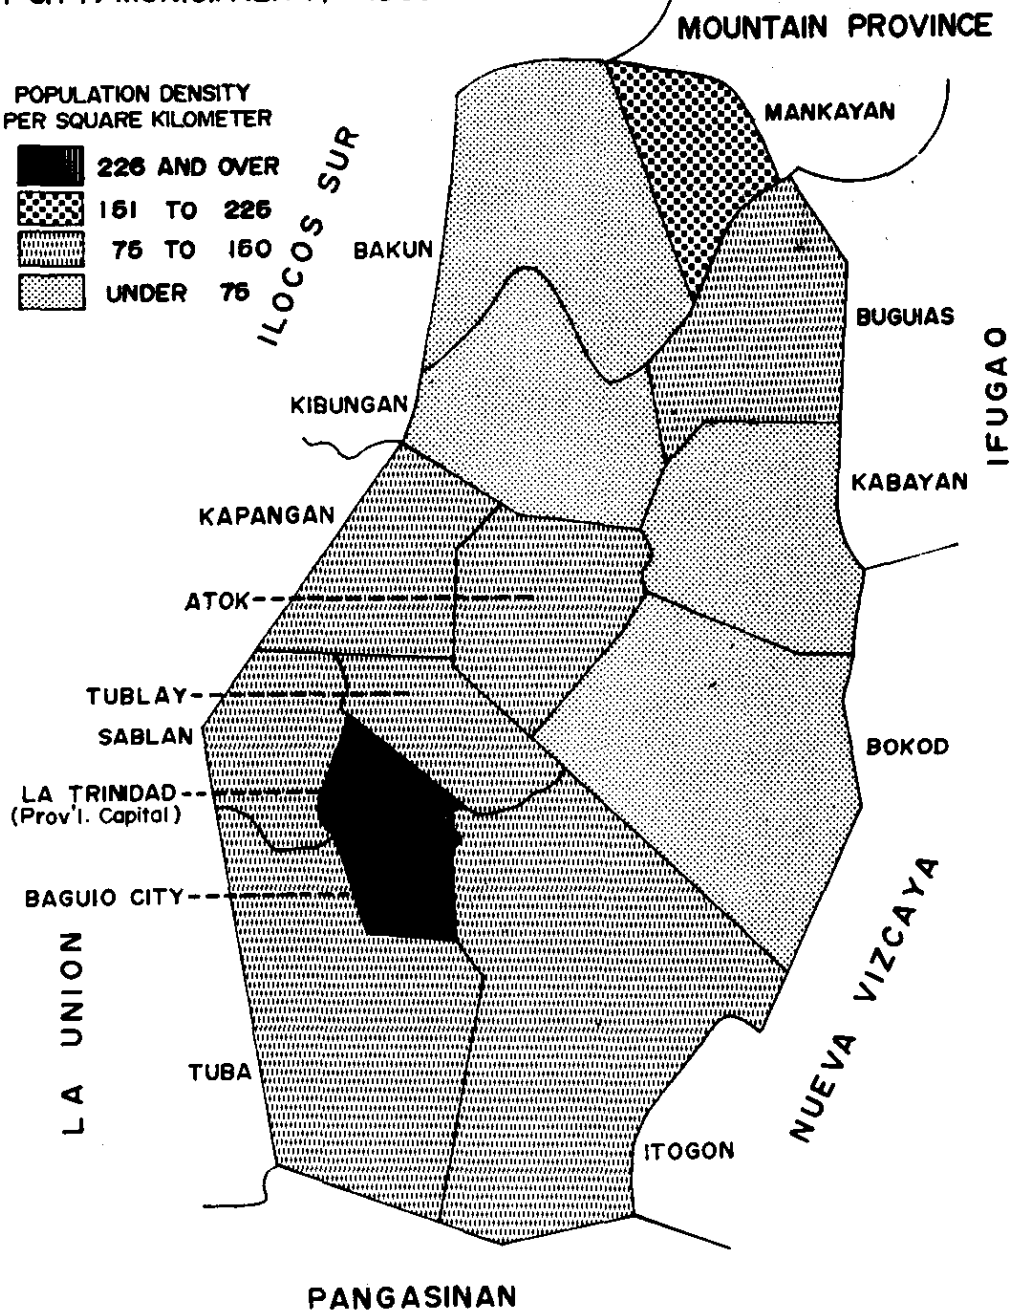

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

**POPULATION DENSITY OF
BENGUET PROVINCE
BY CITY/MUNICIPALITY: 1980**

POPULATION DENSITY
PER SQUARE KILOMETER

Benguet: A Brief Analysis

When the huge province of Mountain Province was subdivided on June 18, 1966 by Republic Act No. 4695 four new provinces were created, one of which was Benguet.

Landlocked and shaped like a footprint, Benguet covers an area of 2,655.4 square kilometers (0.89% of the national land area) spread over an almost monotonous topography of hills and mountains. Many of these mountains have steep slopes particularly those on the eastern border where the highest peaks of Luzon soar. No other province could be more exposed to frequent and extensive landslides, endangering not only human lives but also agricultural crops. Destruction of crops is especially distressing for Benguet since it has only limited level lands, consisting of narrow valleys and high plateaus, for agriculture. Indeed, the rugged terrain of the Ilocos Region becomes harshest in Benguet which adjoins six other provinces: Ilocos Sur and Mountain Province on the north, Ifugao and Nueva Vizcaya on the east, Pangasinan on the south, and La Union on the west.

Baguio City, well-known as the summer capital of the Philippines, is Benguet's lone city. There are 12 municipalities which include the provincial capital, La Trinidad.

POPULATION

As of May 1, 1980, the total population of Benguet stood at 354,751. This figure represented an increase of 52,686, or 17.44 percent, over the 302,065 inhabitants enumerated in the census on May 1, 1975. Benguet emerged from this five-year intercensal period with one of the country's highest population growth rates. Its population reached an average annual growth rate of 3.27 percent during the same period, surpassing its own 2.77 percent yearly increase in the earlier 1970-75 intercensal period. Much of the recent rise in the population growth rate was attributed to Baguio City, where approximately one-third of the total population of Benguet had been residing for ten years or more. Growing at 4.08 percent annually between 1975 and 1980, the city's population rose by 21,560 — from 97,449 to 119,009 — which accounted for a little over two-fifths of the whole absolute numerical increase of the provincial population. Notwithstanding its high growth rate, Benguet recorded only a slight increase in its population density, from 113.8 in 1975 to 133.6 persons per square kilometer in 1980.

Benguet is predominantly rural. In 1980, the number of rural residents roughly doubled that of urban dwellers (232,315 against 122,436). The following table shows that the proportions of the rural and urban population relative to the total population, after re-

A BRIEF ANALYSIS

maining essentially unchanged during the 1970-75 intercensal period, somewhat varied over the next five years. Gaining during the 1975-80 period was the proportion of the urban population, rising from 32.26 percent to 34.51 percent. The proportion of the rural population dropped from 67.74 percent to 65.49 percent. Apparently, the rate of increase of the urban population from 1975 to 1980 outpaced that of the rural population (25.64% versus 13.54%). With its tremendous growth rate and near-monopoly of Benguet's urban population, entirely-urban Baguio City was easily responsible for the slight growth of the proportion of the urban population. Its share of the provincial urban population diminished to 97.20 percent in 1980 owing to urbanization in certain areas of La Trinidad.

**TABLE A – URBAN-RURAL POPULATION BY SEX,
BENGUET: 1970, 1975 AND 1980**

Area Classification and Sex	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>354,751</u>	<u>100.00</u>	<u>302,065</u>	<u>100.00</u>	<u>263,550</u>	<u>100.00</u>
Male	180,219	50.80	153,667	50.87	130,673	49.58
Female	174,532	49.20	148,398	49.13	132,877	50.42
Urban	<u>122,436</u>	<u>34.51</u>	<u>97,449</u>	<u>32.26</u>	<u>84,538</u>	<u>32.08</u>
Male	59,596	16.80	47,279	15.65	40,668	15.43
Female	62,840	17.71	50,170	16.61	43,870	16.65
Rural	<u>232,315</u>	<u>65.49</u>	<u>204,616</u>	<u>67.74</u>	<u>179,012</u>	<u>67.92</u>
Male	120,623	34.00	106,388	35.22	90,005	34.15
Female	111,692	31.49	98,228	32.52	89,007	33.77

Continuing the predominance of males in 1975, the population of Benguet included 180,219 males and 174,532 females in 1980. There was only a minor change in the sex ratio during the past five years, from 103.55 to 103.26. All throughout the last ten years (1970-80), the females had consistently composed the majority of the urban population; the males, the majority of the rural population. In 1980, the urban population posted a sex ratio of 94.84 while the rural population had 108.00.

Figure 1 contains the diagram of the 1980 age-sex composition of urban and rural population. Each bar in the diagram represents the proportion of males or females, urban or rural, in five-year age groups relative to the total population. As shown in the diagram, the bars corresponding to both males and females of the rural population progressively shorten as the age group becomes older with the exception of the females in the age group 15-19. In effect, the rural population exhibits a pyramid structure the broad base of which is formed by persons under 5 years of age, male and female, and the narrow apex, by those 80 years old and over. In contrast, the structure of the urban population is characterized by a relatively narrow base, particularly the three youngest groups of both males and females.

A BRIEF ANALYSIS

AGE COMPOSITION

A little over two-fifths of the total population in 1980 are 0-14 years of age (40.29%); 57.46 percent, 15-64; and 2.25 percent, at least 65. These proportions, as the following table shows, are different from those in either 1970 or 1975. For each broad age group, the change in the proportion from 1975 to 1980 parallels the trend in the 1970-75 intercensal period. The proportions of children under 15 years of age and of persons 15-64 years each went through far lower amount of change in 1975-80 than in the 1970-75 period. The reverse is true for the proportion of the elderly (those 65 and above).

**TABLE B - AGE COMPOSITION OF THE POPULATION,
BENGUET: 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>354,751</u>	<u>100.00</u>	<u>302,065</u>	<u>100.00</u>	<u>263,550</u>	<u>100.00</u>
0 - 14 years	142,945	40.29	129,187	42.77	119,733	45.43
15 - 64 years	203,833	57.46	166,920	55.26	139,013	52.75
65 years and over	7,973	2.25	5,958	1.97	4,804	1.82

A BRIEF ANALYSIS

Wide variation in the age structure particularly for the two younger broad groups occur between the urban and rural population. More than one-third (35.60%) of all urban residents are 0-14 years old; 61.81 percent, 15-64 and 2.59 percent, 65 and over. The corresponding proportions for the rural population are 42.77 percent, 55.16 percent and 2.07 percent.

The population has a median age of 19 years. As can be deduced from a comparison of their age structures, the rural population in 1980 is younger than the urban population (the median age of the former is 18 years, compared with 20 years for the latter).

Dependency ratio for the province as a whole decreased remarkably from 80.96 in 1975 to 74.04 in 1980 as a result of the increased percentage of persons 15-64 years old. Urban dependency ratio was markedly lower than that of the rural population – 61.78 for the former and 81.28 for the latter.

MARITAL STATUS

Still forming the largest group, the never-married persons accounted for 48.94 percent of the total population 10 years of age and older in 1980. As the next table shows, this proportion underwent a decline from 51.13 percent in 1975 after gaining by 1.80 percentage points in the earlier 1970-75 period. Those married constituted 47.14 percent, which represented an increase of 1.61 percentage points over 1975. This proportion had shown a

Divorced/separated	821	0.65	567	0.54	638	0.70
Not stated	98	0.08	33	0.03	128	0.14

A BRIEF ANALYSIS

decrease in 1970-75. The proportions of the widowed and of those divorced or separated, both of which fell in 1970-75, also posted gains in 1975-80. The former rose to 3.41 percent; the latter to 0.45 percent. The widowed and the divorced or separated population grew by 39.84 percent and 40.12 percent, respectively, between 1975 and 1980. In contrast, the rates of growth during the same period for those single and married were only 14.94 percent and 24.32 percent, respectively.

The gap between the never-married and married proportions was somewhat wide in the males. While single males made up 51.34 percent, those married comprised 46.73 percent. This spelled for Benguet the existence of an overall wide margin between the single and married population between the two sexes as it was the married rather than those single who predominated the females (47.55% against 46.47%). Barely 1.62 percent of the males were widowed and 0.26 percent, divorced or separated. Among the females, the widowed made up 5.25 percent and those divorced or separated, 0.65 percent.

FIG. 2 - MARITAL STATUS OF THE POPULATION
10 YEARS OLD AND OVER BY SEX,
BENGUET: 1980

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

Fewer people at least 7 years old had not completed any grade in 1980 than in 1975. Their proportion to the total private household population 7 years of age and older consequently dropped over the past five years from 12.16 percent to 9.46 percent. Persons schooled no higher than the elementary level were still the most numerous, but the rate of growth of their population from 1975 to 1980 was considerably outpaced by each of the rates of growth of the population of those who had reached as far as high school, college and even those holders of academic degree. As a result, the proportion of those with only elementary training decreased over the past five years from 50.24 percent to 45.45 percent. Persons attaining high school posted an increase, from 22.72 percent to 26.37 percent, and so did the proportion of those who had attended college, from 8.51 percent to 12.28 percent as well as that of academic degree holders, from 4.86 percent to 6.24 percent. A small 0.20 percent in 1980 did not give their school attainment.

The table below gives the distribution by highest grade completed of the private household population 7 years old and over in 1975 and 1980:

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD
AND OVER BY HIGHEST GRADE COMPLETED,
BENGUET: 1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>279,767</u>	<u>100.00</u>	<u>239,115</u>	<u>100.00</u>
No grade completed	26,466	9.46	29,065	12.16
Elementary	127,147	45.45	120,130	50.24
High school	73,779	26.37	54,321	22.72
College	34,370	12.28	20,354	8.51
Academic degree holder	17,448	6.24	11,633	4.86
Not stated	557	0.20	3,612	1.51

The population of the purely elementary educated were composed mostly in 1980 by finishers of the sixth and seventh grades (39.16%), followed by persons who had completed first to third grade (33.60%). Those who had reached fourth grade and fifth grade made up, respectively, 14.45 percent and 12.79 percent. Finishers of first to third year comprised close to three-fifths of all the high school achievers (58.26%); secondary graduates numbered 41.74 percent. Nearly eighty percent of the college undergraduates had attended first to third year (79.40%); only 20.60 percent finished fourth year or higher.

A BRIEF ANALYSIS

LITERACY

The rate of literacy of private household population 10 years of age and older was 84.82 percent. Of the 214,242 literates, 51.39 percent were males; 48.61 percent, females. The male literacy rate (86.41%) was 3.22 percentage points higher than the literacy rate of females (83.19%). As expected, the literacy rate of urban residents (95.32%) was substantially higher than that of their rural counterparts (78.85%). This may be attributed to existence of more schools and greater accessibility in urban areas. Nevertheless, the sex differential in literacy still prevailed, with greater differential in rural than in urban areas.

A BRIEF ANALYSIS

FIG. 4 - PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION 10 YEARS OLD AND OVER BY SEX, URBAN - RURAL, BENGUET: 1980

LANGUAGE OR DIALECT

A great number of languages and dialects have been noted in Benguet without one being generally spoken by a majority of the private households. Ilocano, spoken by a little over one-third of all households (33.75%), Kangkanai (23.56%) and Inibaloi (20.53%) are the dialects most strongly represented in 1980. Rounding out the top six dialects are: Tagalog (7.23%), Pangasinan (5.89%) and Bontoc (4.47%).

In Benguet's urban sector, however, Ilocano is generally spoken by more than three-fifths of all private households (62.49%). Tagalog (16.64%) and Pangasinan (5.51%) claim the second and third largest shares, respectively. The three leading tongues of the province as a whole are, likewise, the most widely used in the rural areas but with altered ranks. With 33.84 percent of all rural private households speaking it, Kangkanai is ahead followed by Inibaloi (28.93%) and Ilocano (19.25%).

A BRIEF ANALYSIS

GAINFUL OCCUPATION

A total of 114,712 persons 15 years of age and older have gainful work in 1980, up from 94,030 in 1975 and 93,185 in 1970. Most of them are males (69.58%); only 30.42 percent are females.

The table below shows that employment during the 1975-80 period increased in most of the occupation groups. The relative share of agricultural, animal husbandry and forestry workers, fishermen and hunters has continuously declined in the last 10 years, from 50.72 percent in 1970 to 45.81 percent in 1975 and 41.01 percent in 1980. The production and related workers, transport equipment operators and laborers constitute 27.78 percent in 1980 and have kept their position as the second biggest occupation group. Service workers number 9.82 percent, up by 0.75 percentage point since 1975. The proportion of the professional, technical and related workers posted the third largest gain in 1975-80 (1.40 percentage points) as it reached 8.46 percent in 1980. Sales workers make up 6.29 percent in 1980, slightly lower than the 6.48 percent share in 1975. Clerical and related workers rose by 0.34 percentage point since 1975 to 4.35 percent in 1980. At 0.57 percent in 1980, the administrative, executive and managerial workers had dropped to half their levels in 1970 and 1975.

**TABLE E — GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR OCCUPATION GROUP,
BENGUET: 1970, 1975 AND 1980**

Major Occupation Group	1980		1975		1970

Production and related workers, transport equipment operators and laborers	31,864	27.78	23,932	25.45	21,481	23.05
Workers not classifiable by occupation	1,971	1.72	983	1.04	1,417	1.52

A BRIEF ANALYSIS

**FIG. 5 - GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR OCCUPATION GROUP, BENGUET: 1980**

INDUSTRY

Three major industry groups together employ close to eighty percent of all gainful workers. They are: agriculture, fishery and forestry, contributing 42.80 percent of all gainful workers, community, social and personal services (19.41%), and mining and quarrying (16.15%). The remaining proportion is dispersed in the other industry groups as follows: wholesale and retail trade, 6.06 percent; transportation, storage and communication, 5.01 percent; construction, 4.38 percent; manufacturing, 3.23 percent; financing, insurance, real estate and business services, 1.86 percent and electricity, gas and water, 0.91 percent. Activities not adequately defined account for 0.19 percent. Almost all workers under agriculture, fishery and forestry are into agricultural crops production (97.54%). Workers under community, social and personal services tend to concentrate in three fields: personal and household services (33.32%), education services (25.27%) and public administration and defense (18.21%).

A BRIEF ANALYSIS

**FIG. 6 - GAINFUL WORKERS 15 YEARS OLD AND OVER
BY MAJOR INDUSTRY GROUP, BENGUET: 1980**

MIGRATION

Only 90.92 percent of the males and 90.97 percent of the females 5 years of age and older lived in the same city/municipality where they had resided on May 1, 1975.

Not only were the proportions of males and females who had a different place of residence on May 1, 1975 almost equal but their breakdown by previous residence were also nearly identical. Of the males, 5.24 percent had earlier lived in another province; 3.71 percent, in Baguio City or another municipality of Benguet and 0.13 percent, in a foreign country. The corresponding proportions for females were 5.03 percent, 3.85 percent and 0.15 percent, respectively. Majority of these movers transferred to rural areas. However, 6 out of every 10 female movers from other provinces settled in urban areas. And so did most of both male and female movers from abroad.

A BRIEF ANALYSIS

TYPE OF BUILDING

Single house is the abode of a large majority of the 67,189 households in Benguet (72.22%), followed by apartment/accesoria/condominium/row house, etc. (19.27%) and duplex (5.98%). A slight 1.26 percent are protected in improvised houses (barong-barong) while even smaller proportions than this are housed in buildings of other types. The proportion of households in the urban areas sheltered in single houses (72.16%) is about the same as in the rural areas (72.25%). A little over one-fifth among rural households occupy apartment/accesoria/condominium/row house/etc. (21.67%), surprisingly higher than that of urban households (14.51%). About ten percent in the urban areas live in duplex structures (9.73%), compared with 4.10 percent in the rural areas.

The following table records the number and proportion of households sheltered in the different types of building in 1970 and 1980:

**TABLE F — NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS
BY TYPE OF BUILDING, BENGUET: 1970 AND 1980**

TYPE OF OCCUPANCY

Six out of every ten households own the dwelling units that they occupy (60.07%). Almost one-fourth of all households are free-renters (23.07%); 15.94 percent, tenants/lessees and 0.92 percent, subtenants/sublessees.

A little less than two-thirds of rural households are unit-owners (66.02%); 25.32 percent, free renters; 8.06 percent, tenants/lessees; and 0.60 percent, subtenants/sublessees. The corresponding proportions for urban households are: 48.27, 18.61, 31.57 and 1.55 percent.

A BRIEF ANALYSIS

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Galvanized iron, the dominant roof material in both urban and rural areas, roof dwelling units sheltering 84.08 percent of all households; cogon/nipa, 12.01 percent; makeshift/ salvaged material, 1.69 percent; tile/concrete/brick/stone, 1.28 percent; asbestos, 0.13 percent and other materials as anahaw, 0.81 percent. About ninety-five percent of the urban households live in units with galvanized iron roofs (94.49%), far larger than the 78.83 percent in the rural areas where cogon/nipa-roofed units protect 17.73 percent.

Over ninety percent of all households are held in units walled on the outside by strong materials as galvanized iron/aluminum (units with this outer wall material shelter 42.17% of all households), wood/plywood (27.46%), mixed tile/concrete/brick/stone and wood/plywood (16.91%), tile/concrete/brick/stone (4.44%), and asbestos (0.08%). Compared with 88.75 percent among rural households, 95.64 percent of urban households are residing in these units. Units with weak outer walls are occupied by only 8.94 percent of all households, distributed by kind of materials as makeshift/salvaged materials (3.10%), bamboo/sawali (2.89%), cogon/nipa (2.40%) and other as anahaw (0.55%).

YEAR BUILT

Over two-fifths of all households (42.56%) occupy buildings erected within the last ten years, 1971-80; 27.63 percent, 1961-70; 17.72 percent, 1951-60; 9.05 percent, 1942-50 and 3.04 percent, 1941 or earlier.

In the urban areas, 36.07 percent live in structures built in 1971-80; 31.53 percent, 1961-70; 19.68 percent, 1951-60; 8.11 percent, 1942-50 and 4.61 percent, 1941 or earlier. The corresponding figures for the rural areas are 45.82, 25.66, 16.74, 9.53 and 2.25 percent. Variation on the proportions of households by year built between the urban and rural areas is sharpest in 1961-70 and 1971-80.

FLOOR AREA OF DWELLING UNIT

Well over half of all households occupy dwelling units having a floor area of less than 30 square meters (56.40%); 23.28 percent, 30-49; 8.38 percent, 50-69; 4.94 percent, 70-99 and 7.00 percent, 100 or over.

There is a marked difference between the urban and rural areas in the distribution of households by floor area of their dwelling units. Of the total urban households, 28.88 percent live in units less than 30 square meters; 29.07 percent, 30-49; 14.97 percent, 50-69; 10.19 percent, 70-99; 16.89 percent, 100 or more. The corresponding proportions for rural households are 70.28, 20.35, 5.06, 2.29 and 2.02 percent.

TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of all households occupying their dwelling units as owners, 92.04 percent also own the land occupied by their abodes; 0.88 percent either lease or sublease the land and 0.12 percent are either farm lessees or agricultural tenants; those enjoying other legal tenures constitute 1.60 percent and those without any, like squatters, 5.36 percent. The rate of lot ownership reached 95.15 percent in the rural areas, far more than the 83.61 percent in the urban areas. Over a tenth have no tenure at all in the latter (12.24%), compared with only 2.83 percent in the former.

SOURCE AND USE OF WATER SUPPLY

The faucet, community water system supply far more households than the other sources of water combined for each of the three uses of water considered in the 1980 cen-

A BRIEF ANALYSIS

sus namely, drinking, kitchen use and laundry. It provides drinking water to 69.72 percent of all households, kitchen-use water to 69.60 percent, and laundry water to 67.53 percent. A vast majority of these households are reached through faucets inside the house or yard. A substantial number report spring as their source of water supply; 15.84 percent of all households rely on it for drinking, 15.82 percent for kitchen purposes, and 15.13 percent for laundry. Dug well furnish a lot more households with water for drinking and for kitchen use (9.21% and 9.25%, respectively), than those it services with laundry water (5.22%). Lake, river, stream, irrigation and the like are relied on primarily for laundry (7.52%) rather than for drinking (0.64%) and kitchen utility (0.72%).

KIND OF LIGHTING FACILITIES

Electricity illuminates the abodes of 55.13 percent of all households; kerosene, 33.70 percent and LPG, 1.54 percent. Only a handful use oil (0.04%) and less than a tenth, other kinds (9.59%). Electricity is dominant in the urban areas, with 87.07 percent of all households using it, but is overshadowed in the rural areas by kerosene, used by 44.78 percent of all rural households as against 39.03 percent for electricity. Further, other kinds of lighting facilities are resorted to in the rural areas by 14.26 percent compared with only 0.32 percent for the urban areas.

COOKING FUEL

Almost one-half of the households cook with wood or charcoal (49.27%); 23.43 percent, kerosene; 21.83 percent, LPG; 4.20 percent, electricity and 1.27 percent, other fuel. A large majority of the rural households use wood or charcoal (69.93%), compared with only 8.32 percent among urban households. Liquefied petroleum gas, preferred by 45.13 percent of the urban households, is the most common cooking fuel in the urban areas with kerosene not far behind (38.40%).

TOILET FACILITIES

Nearly one-half of all households have water-sealed toilets (49.71%). According to toilet's depository and use, whether exclusive for one household or shared by two or more, this percentage is broken down as follows: 26.83 percent, sewer/septic tank and exclusive; 15.96 percent, same depository but shared; 5.42 percent, other depository and shared and 1.50 percent, also other depository but exclusive. Almost equal numbers utilize closed pits (23.66%) and open pits (23.14%). Other types of toilet facilities as the pail system are availed of by 0.82 percent while 2.67 percent have no toilet at all. Water-sealed toilets are used by 83.44 percent of all urban households, more than double the 32.69 percent among rural households. In the rural areas, the proportion of households using the water-sealed is not much higher than those using the closed pit (31.24%) or the open pit (31.02%).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

A little less than three-quarters of the households have a radio (74.83%), 21.20 percent, television set and 15.19 percent, refrigerator or freezer. Ownership of these appliances is more widespread in the urban than in the rural areas, especially for television set and refrigerator or freezer. Among urban households, 85.64 percent own a radio; 46.01 percent, television set and 33.02 percent, refrigerator or freezer. The corresponding proportions for rural households are: 69.38 percent, 8.69 percent and 6.20 percent.

CERTIFICATION

I HEREBY CERTIFY that the data set forth in this form were personally obtained by me in accordance with the rules and regulations promulgated by the National Census and Statistics Office.

Name of person accomplishing this form
(Printed Name & Sign)
Title _____
Date _____ 1980

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives or U.N., ILO or USAID officials who, like diplomatic representatives, are subject reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

4. CORRECTIVE AND PENAL INSTITUTIONS

- a. All prisoners in national prisons and reformatories (wellareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS

- a. Monks, priests, ministers, nuns, seminarists, etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- b. Students in boarding schools (schools where students are required to stay in the school campus).
- c. Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

6. MILITARY CAMPS AND STATIONS (P.C. Army, Air Force and Navy); PMA

- a. Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval vessels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- c. Detainees who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980.
- d. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a week.

7. LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS, PLANTATIONS AND AGRICULTURAL/FISHERIES EXPERIMENTAL OR BREEDING STATIONS, ETC.

- a. Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc.) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

8. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS

- a. Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every six months.
- b. Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

9. REFUGEE CAMPS

- a. Filipino citizens working and living inside the camps.
